

Economic Growth Region 3

Statistical Data Report for June 2014, Released July 2014

Regional and State Unemployment (seasonally adjusted)

Regional and state unemployment rates were generally little changed in June. Twenty-two states and the District of Columbia had unemployment rate decreases from May, 14 states had increases, and 14 states had no change, the U.S. Bureau of Labor Statistics reported. Forty-nine states and the District of Columbia had unemployment rate decreases from a year earlier and one state had an increase. The national jobless rate declined to 6.1 percent from May and was 1.4 percentage points lower than in June 2013.

Mississippi and Rhode Island had the highest unemployment rates among the states in June, 7.9 percent each. North Dakota again had the lowest jobless rate, 2.7 percent. In total, 17 states had unemployment rates significantly lower than the U.S. figure of 6.1 percent, eight states and the District of Columbia had measurably higher rates, and 25 states had rates that were not appreciably different from that of the nation.

Economic Growth Region (EGR) 3

Adams, Allen, DeKalb, Grant, Huntington, Lagrange, Noble, Steuben, Wabash, Wells, and Whitley Counties.

Larger Establishments More Likely than Smaller Establishments to Offer Medical Care Benefits

(Excerpted from the U.S. Dept. of Labor, Bureau of Labor Statistics, *The Editor's Desk* — July 29, 2014)

Employer-provided medical care benefits were available to 69 percent of private-industry workers in the United States in March 2014. Availability of medical care benefits varied by establishment size; 53 percent of workers in establishments with fewer than 50 employees were offered medical care benefits, compared with 89 percent of workers in establishments with 500 employees or more.

Percentage of private-industry employees offered and participating in employer medical care benefits, by establishment size, March 2014

Source: U.S. Bureau of Labor Statistics

Not all private-industry workers who are offered medical care benefits choose to participate in their employer's plan. Among workers in establishments with 500 employees or more who were offered medical care benefits, 77 percent chose to participate in an employer's plan in March 2014. That compares with a take-up rate of 71 percent of workers in establishments with fewer than 500 employees.

The percentage of workers offered medical care benefits, combined with the percentage who accepted the offer, means that 50 percent of private-industry workers participated in employer-provided medical care benefits in March 2014. As with the availability rates, the participation rates varied by establishment size.

Among private-industry workers who participated in an employer-provided medical care plan in March 2014, employers paid an average of 79 percent of the plan premium for single coverage and 68 percent of the premium for family coverage. The average employer share of the premium payment for single coverage varied little by establishment size. For family coverage, larger establishments paid a higher average share of the premium.

These data are from the National Compensation Survey – Benefits program. To learn more, see "Employee Benefits in the United States — March 2014," news release USDL-14-1348.

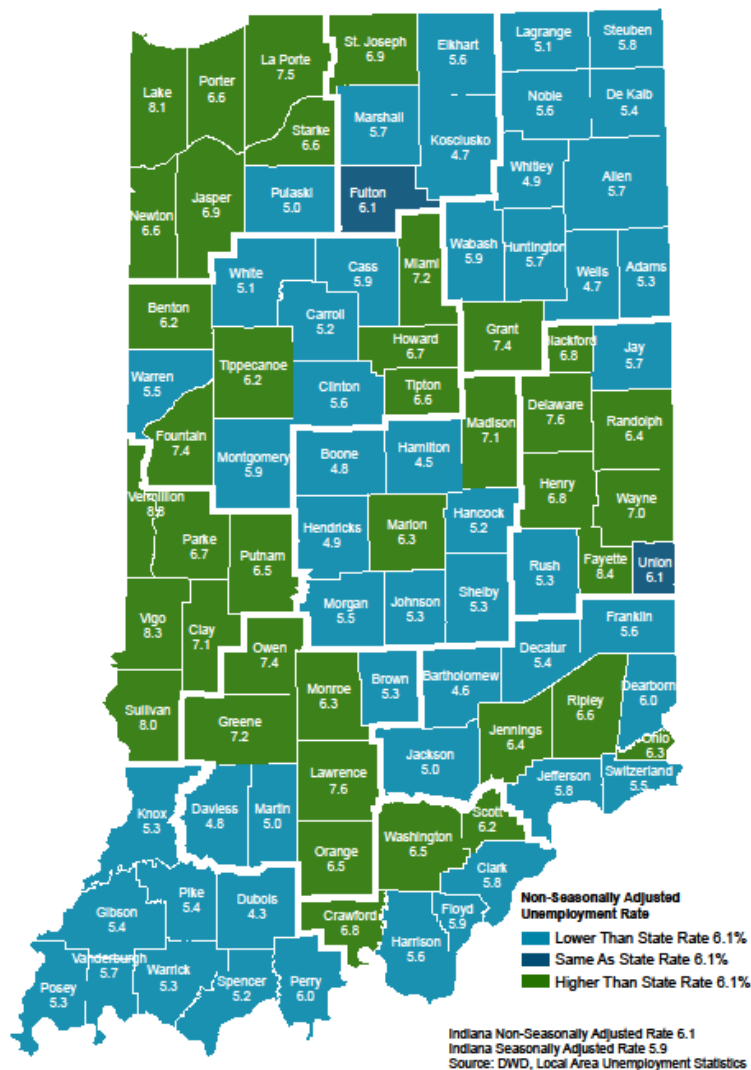

Frequently Listed Jobs
